## Travel Plug Adapter with USB Charger for iPod®, notebooks, and more

### Instruction Guide

### Contents

- A Travel Plug Adapter
- B USB Adapter Cap
- C AC Adapter Cap
- D Extra Fuse
- E Instruction Guide

### Components

- F Release Button
- G Plug Selectors

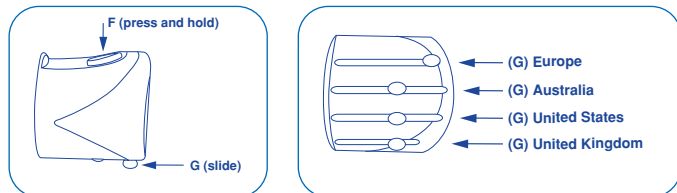

**IMPORTANT:** Using the Travel Plug Adapter *with the AC adapter cap* allows your electronic equipment's plug to fit into electric outlets worldwide, but it does not reduce or convert electrical AC voltage. Using the Travel Plug Adapter in a power source with voltage higher or lower than your electronic equipment specifies creates a risk of damaging or destroying the equipment and a risk of other serious safety hazards. Note, however, that using the Travel Plug Adapter *with the USB adapter cap* does convert the voltage in any outlet worldwide to the correct voltage for USB.

## Getting Started

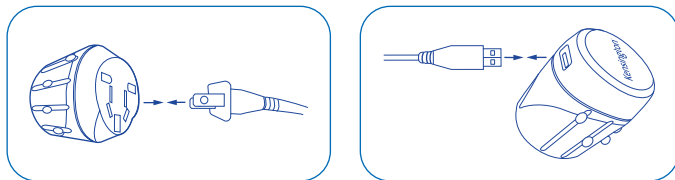

1. For devices with an AC plug, snap the AC adapter cap (C) onto the Travel Plug Adapter (A). For USB devices, snap the USB adapter cap (B) onto the Travel Plug Adapter (A).

2. Press and hold the release button (F) on the Travel Plug Adapter (A). While holding the button, slide the desired plug selector (G) forward until it snaps into place.

**NOTE:** You must press and hold the release button (F) and slide all plug selectors (G) backward into the locked position before you can move another plug selector (G) forward.

3. Plug your device's AC or USB cord into the corresponding adapter cap (B or C).

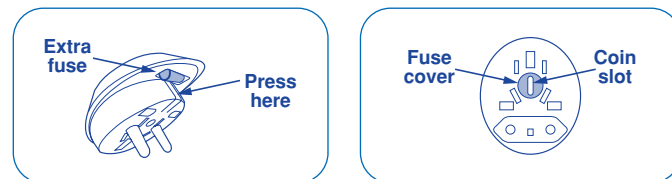

4. Plug the Travel Plug Adapter (A) into a power outlet. The battery indicator/charging light comes on. If you are using an iPod shuffle, it may take up to one minute for the light to come on.

**NOTE:** To remove the AC adapter cap (B) or USB adapter cap (C) from the Travel Plug Adapter (A), press and hold the release button (F) and then remove the cap.

## Fuse Information

The Travel Plug Adapter (A) comes with a fuse installed and an extra fuse (D) located in the AC adapter cap (B). **Use only T2.5A fuses with the Travel Plug Adapter.**

If you need to replace the fuse:

1. Remove the extra fuse from the AC adapter cap (B). With the tip of a pen, press on the plastic notch located next to the fuse, and then turn the AC adapter cap upside down. The fuse should fall out of the cap.
2. Remove the fuse from the Travel Plug Adapter. Using a coin, turn the fuse cover and pop out the fuse.
3. Insert the extra fuse into the Travel Plug Adapter.

## Usage

The Travel Plug Adapter can be used with Class II electronic devices up to 2.5A (110V n 275W / 220V n 550W). Most consumer electronic devices, such as cell phones, PDAs, laptop computers, alarm clocks, battery chargers, and more, are Class II devices.

Any use of this product other than as described in the instructions above will void the warranty.

The manufacturer declines any responsibility in case of damage.
