

KENSINGTON®

SonicLock™

Motion Detecting Alarm

Road warriors risk losing their notebooks to theft every time they travel. That's why Kensington designed SonicLock™, a motion-detecting alarm that stops theft before it starts. Notebook theft is on the rise—nearly 30,000 notebooks were stolen in airports alone last year. SonicLock easily attaches directly to a carrying case or notebook computer, discouraging thieves with an audible warning. Users can quickly set and disarm SonicLock with the easy-to-use programmable keypad for security on the go.

Designed for Road Warriors

Who has time to worry about notebook theft when making a quick phone call at the airport or checking in at a busy hotel? SonicLock is the simple solution.

- Attaches to carrying case, or directly into security slot on most notebook computers (adapter included)
- Three-digit user-programmable numeric keypad
- Selectable code quickly disarms with no false alarm
- Three motion-sensitivity settings—appropriate for any environment
- Lightweight and compact for mobile computing
- No keys to fumble with or lose

Repels Thieves

Thieves don't want to be caught in the act. That's why they'll stay away from notebooks protected by SonicLock.

- Flashing warning light and loud alarm deter tampering and theft
- Visually discourages would-be thieves from picking up computer case
- Audible in crowded public places
- Heavy-duty shackle prohibits thieves from cutting alarm off computer case

SonicLock offers security on the go. Simply attach to your carrying case or directly to notebook computer.
